2012.

The village of Rawsonville was a very important part of the Area as most boats or ships came into Rawsonville to bring supplies and new pioneers into the area. Rawsonville was destroyed by the lake when God put the dam in. I was told some of the houses were pushed into the lake. I other pictures - The little church was torn down - There was also a cheese factory.

This picture is what it looks like now.
